-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horton, Jr., 4419794 in view of O'Mahoney, 6594865.

Horton, Jr. discloses a clip for a belt having an external part (33) and an internal part (17, 27, 29), wherein the internal part includes a lower height than the external part, a ninety degree slant inside a top of the part, a plugging door (indicated at 23 in figure 1) located on the bottom portion of the internal part, a pair of plugs on each side of the door for receiving the head of the t-shaped portion (49), and protrusions (29) extending from the bottom of each socket. Horton, Jr. also discloses a connecting part (19, 35, figure 4) connecting the bottom of the internal part to the bottom of the external part. Horton fails to disclose a top portion of the external part having a large thickness that gradually becomes thinner toward the bottom of the part.

O'Mahony discloses a clip having an external part (14) having a large thickness (18, figure 1F) gradually becoming thinner toward the bottom of the part. O'Mahony also discloses a means for attaching the clip, which is construed as an internal part (28).

The use of the terms top and bottom in the claims are considered intended use limitations, i.e., the intended orientation of the clip. Horton's clip structurally meets

Art Unit: 3677

these limitations if you disconnect the clip from the belt (39) and turn the clip 180 degrees from what is shown in the drawings.

It would have been obvious to a person having ordinary skill in the art to replace Horton's external clip portion with O'Mahony's external clip portion in order to provide a clip that can be easily removed from a belt.

Regarding claim 2, Horton, Jr. discloses an external clip with a concave surface (above 39 in figure 4).
